PROFESSIONAL SUMMARY

Software Developer with full-stack experience across Python, JavaScript/TypeScript, Dart, and Java, spanning web (React, FastAPI, Flask), mobile (Flutter), and data-driven applications (SQL, MySQL, PostgreSQL). Delivered production features during a development internship and shipped multiple end-to-end personal projects, including REST APIs, CI/CD pipelines, and cloud-integrated systems (Azure, AWS, Firebase). Complements development skills with hands-on IT infrastructure experience (Active Directory, Microsoft 365, endpoint management), Agile delivery, and regular use of AI-assisted development tools (GitHub Copilot, ChatGPT). Adapts quickly to new languages, frameworks, and team environments.

SKILLS SUMMARY

Software Development : Python, Java, JavaScript, TypeScript, Dart, React, Flutter, FastAPI, Flask, REST APIs, OOP.
Database & Data : MySQL, PostgreSQL, SQL, Database Design, Data Processing, Data Modelling, API Integration.
Cloud & DevOps : Docker, CI/CD, Azure, AWS (S3), Firebase Firestore, Vercel, Git, GitHub, BitBucket.
Development Practices : Agile, Asana, Requirements Gathering, Debugging, Software Testing, Technical Documentation.
ICT Support : Active Directory (AD), Microsoft Entra ID, Intune, Microsoft 365, Jira, NinjaOne, VirtualBox.

WORK EXPERIENCE

Software Developer, Internship

Jan 2024 – Jan 2025

Everything You Need

- Implemented dark/light mode using ThemeData + setState/Provider, improving UI consistency across the app.
- Fixed navigation issues using navigator (routes, push, pop), making transitions smoother and reducing screen bugs.
- Changed layouts and fixed margin/alignment issues Expanded, Flexible, MediaQuery, Improving responsiveness (20-30%).
- Implemented HR/Payroll features using Stripe, reducing manual staff processing time by 25%.
- Fixed bugs using Flutter DevTools + console logs, reducing UI issues and improving stability by 40%.
- Used Git with BitBucket and tracked tasks on Asana, Completing sprint tasks on time (90%+ task completion per sprint).
- Developed REST API integrations to retrieve and display staff account and group data from Firebase Firestore, supporting rostering workflows and improving access to scheduling information.
- Implemented data validation and error handling for API requests, improving reliability when retrieving staff and rostering.

IT Support Assistant

Feb 2025 – Feb 2026

Laurent

- Managed Active Directory user accounts, password and MFA resets, group and license assignments, shared drives, user verification, and Microsoft 365/Tanda access for 50+ staff across multiple stores.
- Provided remote support for POS systems, iPads, and desktops, performing software updates, device configuration, and troubleshooting network, login, connectivity, and system access issues to minimize operational disruptions.
- Logged and tracked incidents through NinjaOne ticketing systems, following ITIL best practices for incident management.

PROJECTS

WatchWise AI - AI-powered movie/anime recommendation web app

<https://watchwise-ai-puce.vercel.app>

- Built and deployed a full-stack app using React, TypeScript, Tailwind CSS, FastAPI, and Python, using TMDB and Gemini APIs to generate real-time movie/anime recommendations.
- Split the logic so TMDB pulls real movie data and Gemini ranks and explains the top picks, removing fake/made-up recommendations.
- Sped up backend response time by 75% (15s → 3-4s) using async API calls, caching, and reusing connections.
- Containerized the app with Docker and set up a CI/CD pipeline using GitHub Actions to automatically run tests and check builds on every push.

Smart Foot Traffic Monitoring — Capstone Project (Maryborough Council)

- Gathered and refined project requirements through regular stakeholder and supervisor meetings.
- Built a Python data pipeline to clean data (duplicates, missing values, timezone conversion) and store it in MySQL.
- Built Flask API to process requests and return heatmaps and statistic results to UI.
- Built a terminal progress system using Python (Rich) to show real time processing logs and status.
- Tested data outputs, API responses, and visualisations to validate system accuracy and consistency.

EDUCATION

Victoria University

Bachelor of Information Technology

August 2022 – June 2025

GPA 6.06/7.00
